

**Fiscal Year 2003**

**Iowa Corrections Offender Network (ICON) Status Report  
December 31, 2003**

Development of the ICON offender management system continued during FY 2003. Major accomplishments included: a complete re-work of the offender and charge modules; completion of the nursing protocol and pharmacy interaction programs; development of data warehouse programs that allow for data research; and data sharing by Criminal and Juvenile Justice Planning, the Department of Public Safety and the Iowa courts, a first in the nation pilot project that allows sheriffs and police to have access to Corrections' data in their patrol cars, and an expansion of the reports available to the probation/parole officer.

The immediate future of ICON is limited only by funding constraints. ICON projects currently scheduled include time comp calculations, the physician and psychology portions, visiting, discipline, and housing.

It is imperative that time comp be finished by July 1, 2004 because the mainframe system that now exists may not be supported after that date.

The mission of the Iowa Department of Corrections is to:  
**Protect the Public, the Employees, and the Offenders**
